Precautions for Safe Handling

- Opening lock knob with a long nail or anartificial nail may cause a chipping or breaking nail.
- Do not set up housing in a dusty or sandy environment.
- Handle housing carefully to prevent any strong impacts by dropping or crashing.
- Do not leave or keep housing in a place being exposed to direct sunlight or high temperature like on the sand, on the deck of a boat or in the trunk of a car, etc.
- After rinsing housing in fresh water to remove salts, dry with a towel, do not use any kinds of heating equipment.
- Do not use the petroleum solvents such as alcohol, benzin and thinner, or oil/chemicals allied products such as corrosion prevention, lubricant and glazing agents.
- Do not leave or keep housing at any place in high humidity or extreme fluctuations in temperature.
- Keep the housing out of children's reach.

Maintenance/Storage

- Rinse the housing thoroughly in fresh water after use and keep in a cool and dry place, away from direct sunlight.
- Do not keep housing in a place with extreme fluctuations in temperature, extreme cold, or high humidity.
- We recommend a complete overhaul of housing per year.

Camera setting (Please proceed before use)

Remove eye piece cup and hot shoe cap from camera body. All the accessories needs to be removed such as strap.

Press the MENU button.

Select **2** by using left or right button.

Select FINDER/MONITOR

Select Monitor (Manual).

Manual Display Switch Setting

From above setting, you can not use viewfinder. But if you would like to see viewfinder or LCD screen, you can assign the switch on custom key button. Please follow the steps below.

(Assign C4)

Press the MENU button.
Select **2** by using left or right button.
Select custom key.
(Assign the custom button 4 this time.)

Select custom button 4.
Select FINDER/MONITOR CHANGE

The setting is completed. When you press C4 button, you are able to switch Finder or Monitor on your camera.

How to set camera

Place the camera tray bottom of the camera and tighten by camera fixing screw.

Make sure the camera tray is placed correct position. The protrusion of the camera tray always goes to front side of the camera.

This is how you see the camera from a side.

Open the locking latch on both left and right.

To open the locking latch, press and hold the lock of the both locking latch.

Open the rear case and remove the hook on top of the housing.

Put the cases on the clean area.

Clean the flat surface (about 5mm width) where the O-ring attaches on the rear case.

Apply proper amount of silicone grease to your fingers, and then apply it evenly to the O-ring.

Install the O-ring in to the housing.

Make sure that the O-ring is properly installed in the housing with no dust or hair left.

Pull the mode dial and C1/C2 button up.

Make sure the power switch is OFF position.

Set the camera in the housing straight forward.

Make sure the housing dial for the gear moves properly when the lens gear is installed on the lens.

Push the mode dial and C1/C2 button down.

Hook on top of the housing.

Close the locking latch both left and right.
* Please make sure the locking latches are locked.

Make sure ON/OFF switch and all the control works properly.

How to install port

● It is a bayonet type of port. When the camera is installed in the housing, the camera tray locks the port and prevents to rotate port by accident.

* Please make sure the camera tray is removed from housing when you install the port. When the camera tray is installed in the housing, you can not install or remove the port because of the port lock.

Align ● on the housing and the port.

Press the port straight down.

Turn the port clockwise. Align ● on the housing and ■ on the port.

Maintenance after diving

Rinse the product with fresh water and remove all the salt water. Dry it well with a soft dry towel.

Carefully unlock the locking latches and open the housing. Water may remain in the O-ring groove.

Please wipe the water by a cotton swab or a tissue.

Also please wipe the water on the rear case.
